3 Quick EnSite NavX Mapping Tips

To make your life a little less stressful and in the eyes of some nurses a more prepared mapping tech, here are three simple tips for setup that can help you when mapping with EnSite NavX. Classic EnSite NavX mapping requires a lot of troubleshooting because you need to fine-tune your views to match your physician’s movements for faster and more accurate mapping. Respectfully, Steve Miller, RN & The Staff at EnSite

1. Establish your views in dual pane windows. This is a tip to potentially save procedure time, but make sure your physicians are comfortable with the view. If you have dual maps and waveforms, then you are in the right spot. If you only have one map, you can just follow the tabs across the top of your Dx Landmark window. You can just follow the tabs across the top of your Dx Landmark window.

2) Next, select your setup Map. If you are going to perform a map with too much information, you can just follow the tabs across the top of your Dx Landmark window. You can just follow the tabs across the top of your Dx Landmark window.

3) Chose any three mapping tips that will go with your best experience to help you fine-tune your views. Some of these tips include:

- Remember to toggle reentrant off and Auto Color on.
- Remember to toggle reentrant off and Auto Color on.
- Remember to toggle reentrant off and Auto Color on.
- Remember to toggle reentrant off and Auto Color on.

The catheter should also be the first catheter that you shadow. This catheter should also be the first catheter that you shadow. This catheter should also be the first catheter that you shadow. Please see our inventory of EnSite NavX for more information.

Sell Your Used Ultrasound & Diagnostic EP Catheters
